

Nexus™ 50

The sleek, contemporary design of the Nexus 50 range of internal recycling bins will complement any environment, helping to encourage the efficient collection and segregation of recyclable waste.

INTERNAL RECYCLING BIN SYSTEM

Many organisations and authorities are being encouraged to recycle waste within the office and are implementing recycling initiatives to comply with ISO 14001 Environmental Management Systems. Glasdon supply an extensive range of recycling bins to provide ideal solutions for any recycling scheme even where space is limited. These attractive units will encourage efficient waste collection and segregation and help prevent cross-contamination of recyclable materials.

Specifications

Paper: Pastel Green
Cans and Bottles: Red, Yellow or Orange
Non Recyclables: Dark Grey

Non-Standard Colours are available subject to a minimum order quantity. For specific corporate colours, please contact our sales office.

BS 8470:2006
Support your waste management contractor's compliance with BS 8470:2006 - Code of Practice for the Secure Destruction of Confidential Material. "Confidential material to be collected should remain protected from unauthorised access from the point of collection to complete destruction."

Five standard models are available. The eye-catching, stylish graphics and colour-coded apertures make the Nexus 50 units easily identifiable.

Holds 18kg of Waste Paper

The compact units have a deceptively large 50 litre capacity. The confidential and paper units have an aperture which conceals the units contents and allows paper to be stacked as it is placed in the bin. This enables the bin to hold up to 18kg of waste paper!

The rectangular shape of the bin and sloped aperture allows over 3000 sheets of paper to fit neatly into Nexus 50.

Post-Mounted or Wall-Mounting Signs

Post-mounted signs which attach to Nexus 50 or wall mounting signs are available. The sign kits help create a clearly identifiable recycling point in any location, as well as providing an easy and effective way of personalising the product. Sign designs can be specified at point of order.

Easy to empty, easy to clean

Nexus 50 has a front-opening, removable door. This allows easy access to the contents and reduces manual handling problems during emptying as minimal lifting is required. The unit is fitted with a neat sack retention system, which accepts various sizes of sack from 14" to 18" diameter (356mm to 458mm diameter), to cater for different requirements.

Manufactured from self-coloured Duratec** material. The smooth interior and exterior contours allow easy cleaning and add to the attractive, modern appearance of Nexus 50.

*Durapol material is a polymer formulated to withstand extremes of temperature and is impact-tested in our Quality Assurance Laboratory as part of our BS EN ISO 9001:2000 test procedure. Durapol material will not chip or rust, is easy to clean and never needs painting.

**Duratec material has been specially created for use in internal environments. In addition to its attractive appearance it offers a blend of toughness, rigidity and dimensional stability.
